

UDAN FLIGHTS

A large commercial airplane is shown in flight, viewed from a low angle, against a dramatic sunset sky. The sky transitions from a deep orange near the horizon to a dark, almost black, blue at the top. The airplane is dark in color, and its wings and tail are clearly visible. The title 'UDAN FLIGHTS' is written in large, white, sans-serif capital letters across the middle of the image, partially overlapping the airplane.

OBJECTIVE

- Udan Flights is created to meet the needs of online Flight reservation system.
- To provide various flight related features to be accessed easily with few clicks.
- The system allows the user to book flight tickets, search flight tickets, view booking details etc.

TECHNOLOGY STACK

1. Presentation Layer

- NodeJs (JavaScript Runtime Environment)
- Angular 6 (framework to develop web app)
- VsCode (to develop front end)

2. Business Layer

- Java 8 (programming language)
- Postman (for testing restful services)
- Spring Boot (auto configuration)

3. Persistence Layer

- Hibernate (JPA implementation)
- MySql 5.5.1 (database storage)

4. Hardware and Software Requirements

- Windows 10, Ram 4/8 GB
- Google Chrome
Memory Space: 500MB

SERVICES

- **Flight Service:** Performs operations like search flights, book flights, cancel flights and view bookings.
- **User Service:** Registers a new account and login for the customer. It also performs authentication at the time of login.

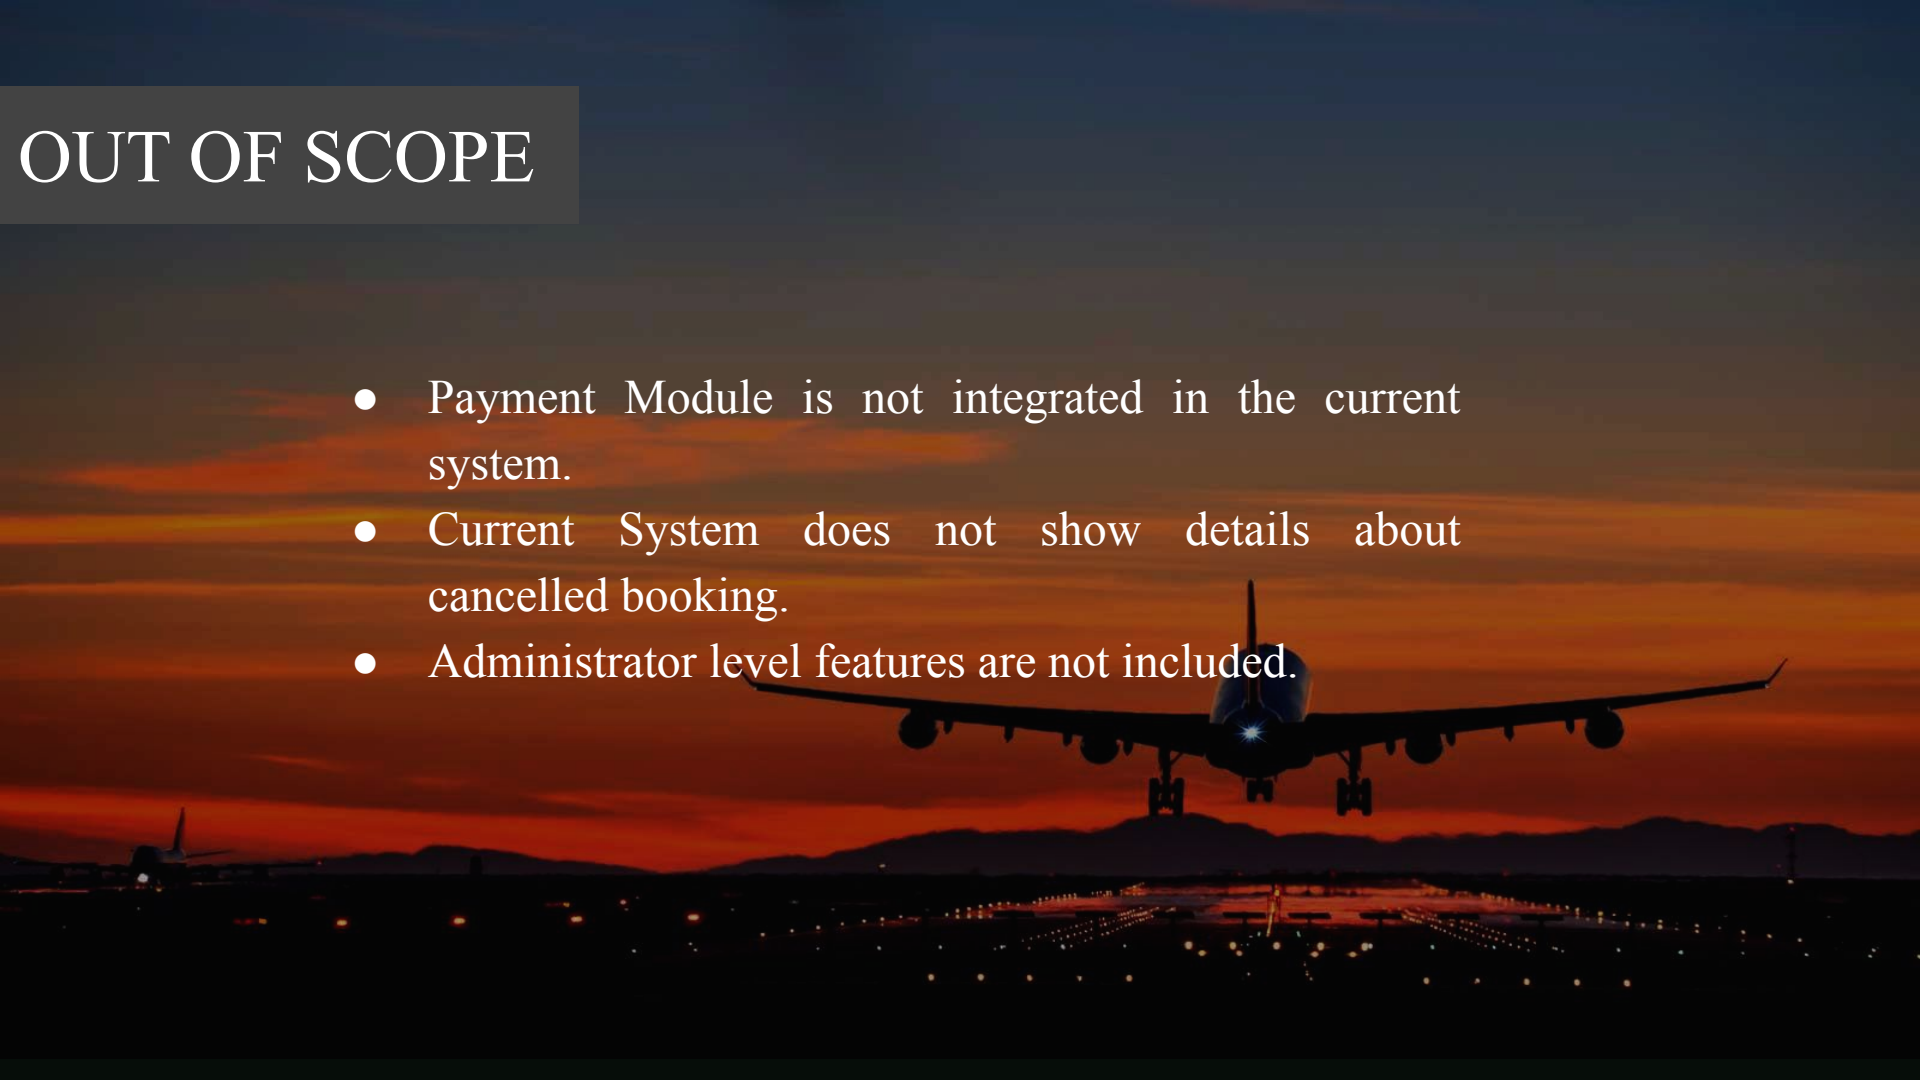

SCOPE

- The scope of the project is limited to booking flight tickets, viewing flight details, cancelling tickets.
- The user must register first in order to use the system. Later the user can login and perform the necessary action.
- System can be used by customers only.
- The architecture implemented is Spring Boot using Spring boot and Angular framework.

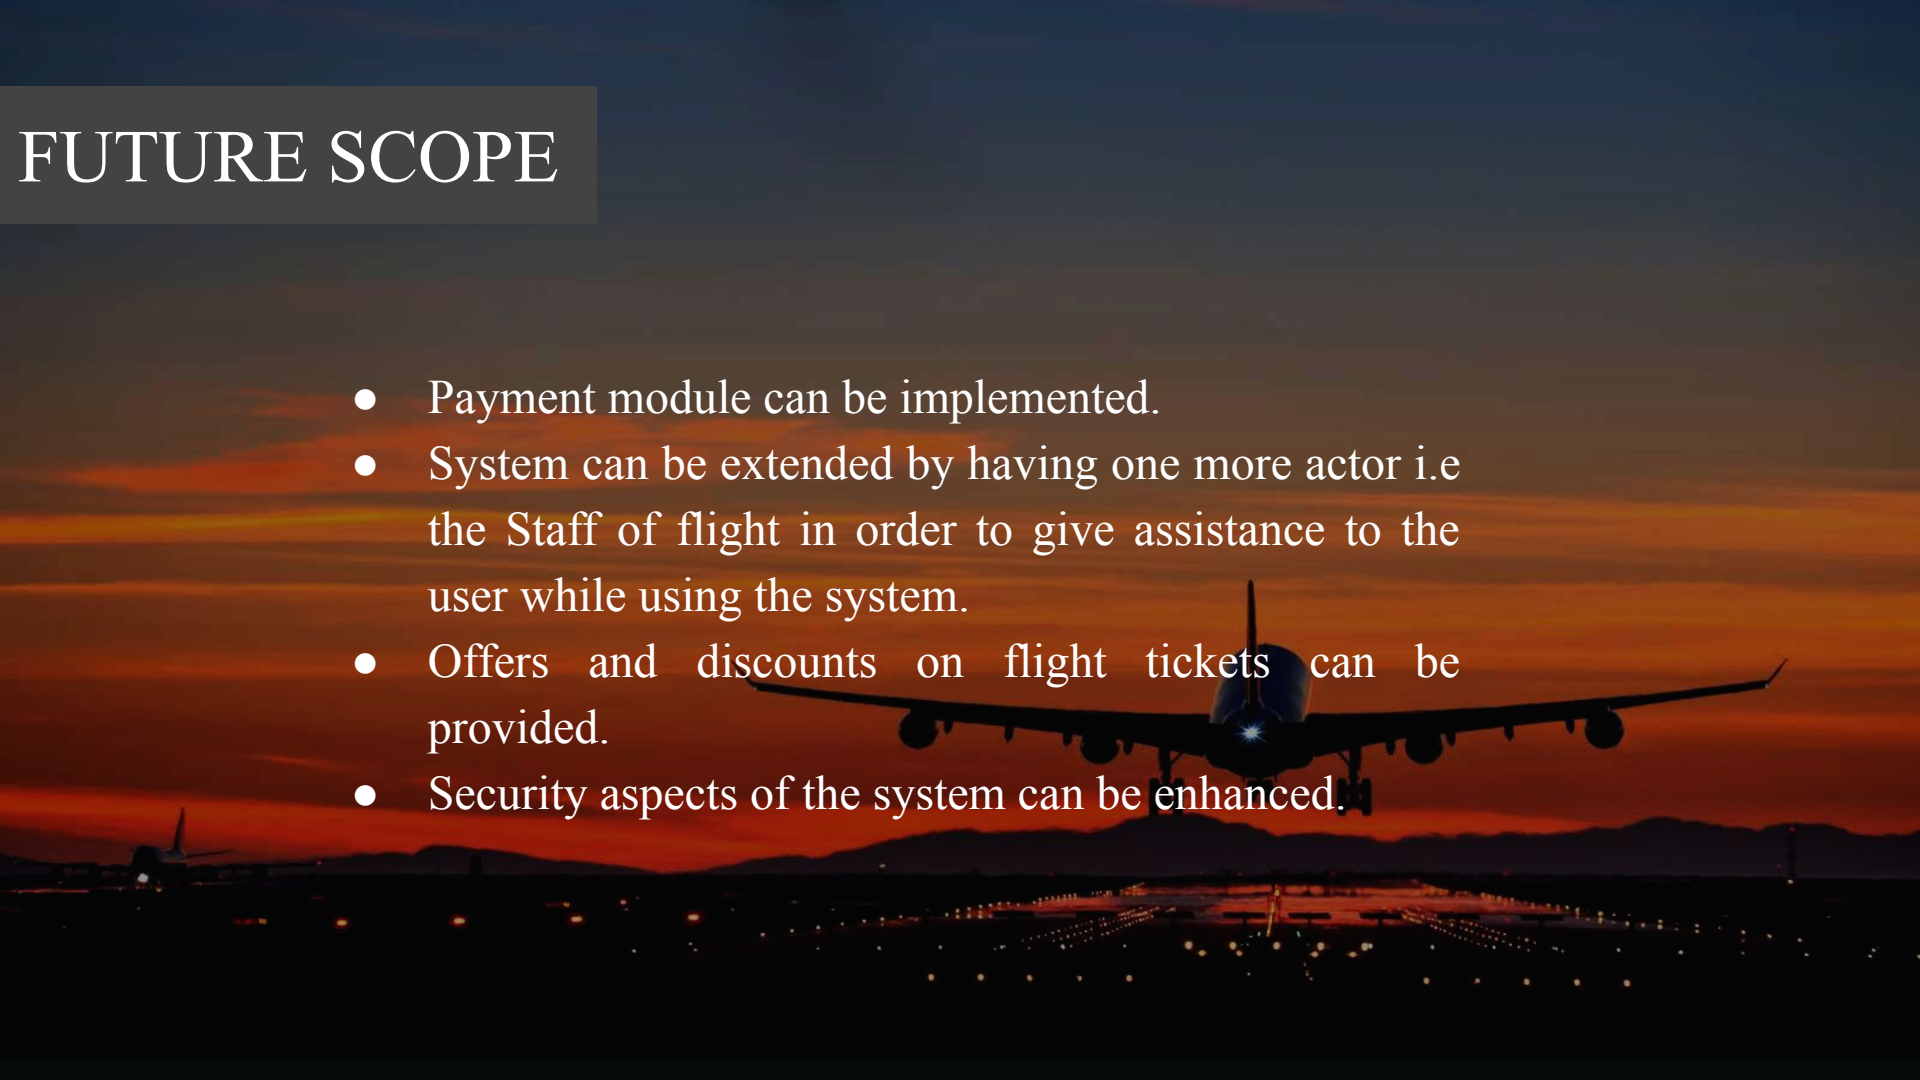

OUT OF SCOPE

- Payment Module is not integrated in the current system.
- Current System does not show details about cancelled booking.
- Administrator level features are not included.

FUTURE SCOPE

- Payment module can be implemented.
- System can be extended by having one more actor i.e the Staff of flight in order to give assistance to the user while using the system.
- Offers and discounts on flight tickets can be provided.
- Security aspects of the system can be enhanced.

THANK YOU
